DATE MAILED: 11/04/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

09/095,397

**Applicant(s)**

KUSCHKE ET AL

**Examiner**

Ronnie Mancho

**Art Unit**

3663

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 August 2004.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

**BEFORE THE BOARD OF PATENT APPEALS  
AND INTERFERENCES**

Application Number: 09/095,397

Filing Date: June 10, 1998

Appellant(s): KUSCHKE ET AL.

Michael J. Striker

For Appellant

### **EXAMINER'S ANSWER**

This is in response to the supplemental appeal brief filed 8/06/04.

**(1) *Real Party in Interest***

A statement identifying the real party in interest is contained in the brief.

**(2) *Related Appeals and Interferences***

A statement identifying the related appeals and interferences which will directly affect or be directly affected by or have a bearing on the decision in the pending appeal is contained in the brief.

**(3) *Status of Claims***

The statement of the status of the claims contained in the brief is correct.

**(4) *Status of Amendments After Final***

The appellant's statement of the status of amendments after final rejection contained in the brief is incorrect. The request for reconsideration submitted by the applicant on 3-27-02 was entered as indicated in the advisory action.

The amendment after final rejection filed on 3-27-02 has been entered.

**(5) *Summary of Invention***

The summary of invention contained in the brief is correct.

**(6) *Issues***

The appellant's statement of the issues in the brief is correct.

Art Unit: 3663

**(7) *Grouping of Claims***

Appellant's brief includes a statement that claims 1-8 do not stand or fall together and provides reasons as set forth in 37 CFR 1.192(c)(7) and (c)(8).

**(8) *Claims Appealed***

The copy of the appealed claims contained in the Appendix to the brief is correct.

**(9) *Prior Art of Record***

5876223	Kaneshige et al	3-1999
5827997	Chung et al	10-1998

**(10) *Grounds of Rejection***

The following ground(s) of rejection are applicable to the appealed claims:

**DETAILED ACTION**

***Specification***

- (i) The disclosure is objected to because of the following informalities:

Page 1 of the specification needs to be rewritten in proper idiomatic English.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

- (ii) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

Art Unit: 3663

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(iii) Claims 1, 2, 5, & 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaneshige et al (5876223).

Regarding claim 1, Kaneshige A. et al (fig. 12) discloses a screening housing for microwave circuits comprising:

a housing body having an interior, said housing body opened at least at one side thereof;  
a cover 11 closing said interior of said housing body;  
a substrate 12 mounted on an inner side of said cover 11; and  
means forming a plurality of chambers provided for accommodating of individual circuit units 17 so that said individual circuit units 17 are screened from one another,

said means including said substrate 12 on said inner side of said cover 11 and a plurality of webs 13 which are formed directly on said substrate 12 so that when said cover 11 closes said housing body said webs 13 form separating walls between said chambers.

Regarding claim 2, Kaneshige A. et al (fig. 12) discloses the screening housing, wherein said housing body is composed of an electromagnetic energy screening material (nickel, copper plating, cot. 4, lines 4-6).

Regarding claim 5, Kaneshige A. et al (fig. 12) discloses the screening housing, wherein said substrate 12 and webs 13 are formed of one piece with one another.

Regarding claim 6, Kaneshige A. et al (fig. 12, cot. 4, lines 4-6) discloses the screening housing, wherein said substrate 12 and webs 13 are composed of the same material.

*Claim Rejections - 35 USC § 103*

(iv). The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

(v) Claims 3, 4, 7, & 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaneshige et al in view of Chung et al (5827997).

Regarding claim 3, Kaneshige A. et al (fig. 12) discloses the screening housing, but did not particularly mention that the substrate is composed of a polymer with embedded metal particles. However, Chung et al (col. 1, lines 39+) teaches of an electromagnetic shielding material composed of a polymer with embedded metal particles. Therefore, it would have been obvious to one of ordinary skill in the art of microwave screening, at the time the invention was made, to make the substrate of the Kaneshige et al device to comprise a polymer with embedded metal particles because a polymer with embedded metal particles is cheaper as taught by Chung, col. 1, lines 30+.

Regarding claim 4, Kaneshige A. et al (fig. 12) discloses the screening housing, but did not particularly mention that the substrate is composed of a silicone mass with embedded metal particles. However, Chung et al (col. 5, line 65) teaches of an electromagnetic shielding material, wherein a substrate (matrix) is composed of a silicone mass with embedded metal particles. Therefore, it would have been obvious to one of ordinary skill in the art of microwave screening, at the time the invention was made, to make the substrate of the Kaneshige et al device to

Art Unit: 3663

comprise a silicone mass with embedded metal particles because it is cheaper as taught by Chung et al, col. 2, line 24.

Regarding claim 7, Kaneshige A. et al (fig. 12) discloses a screening housing for microwave circuits comprising:

- a housing body having an interior, said housing body opened at least at one side thereof;
- a cover 11 closing said interior of said housing body;
- a substrate 12 applied on an inner side of said cover 11; and
- means forming a plurality of chambers provided for accommodating of individual circuit units 17 so that said individual circuit units 17 are screened from one another,

said means including said substrate 12 (applied on an inner side of said cover 11),

and a plurality of webs 13 formed directly on said substrate 12,

wherein when said cover 11 closes said housing body said webs 13 form separating walls between said chambers.

Although Kaneshige A. et al (fig. 12) discloses said substrate 12, they did not particularly mention that the substrate is composed of a polymer with embedded metal particles. However, Kaneshige (col. 4, lines 1-6) suggested that any suitable shielding material could be applied on the inner side of the cover 12. Now, Chung et al (col. 5, lines 64+) teaches of a cheap electromagnetic shielding material composed of a polymer (matrix) with embedded metal particles. Therefore, it would have been obvious to one of ordinary skill in the art of microwave screening, at the time the invention was made, to make the substrate of the Kaneshige et al device to comprise a polymer with embedded metal particles because it is a cheaper EMI shielding material as taught by Chung et al, col. 2, line 24.

Art Unit: 3663

Regarding claim 8, Kaneshige A. et al (fig. 12) in view of Chung et al disclose the screening housing as in claim 7, wherein said substrate 12 and webs 13 are made from the same material and formed of one piece with one another.

**(11) *Response to Argument***

Applicant's arguments filed 6-11-02 have been fully considered but they are not persuasive. The examiner has carefully read applicants arguments, but the arguments are not persuasive.

The applicants have conceded on page 6, paragraph 3 in the brief that Kaneshige et al disclose the limitations of independent claim 1. Accordingly, Kaneshige et al anticipate the claim limitations.

Next, the applicants argue that the walls of the invention are formed directly on the substrate. And that on the other hand, the prior art Kaneshige does not disclose walls formed directly on the substrate. The argument is respectfully traversed. It could be easily seen in figs. 12&13 of Kaneshige that the walls 13 are formed directly on the substrate 12. As best understood by the examiner, the applicant's argument that in the Kaneshige patent, the shielding layer is applied to the walls 13 and the substrate 12 *after* the walls 13 and the substrate 12 have been formed together in one piece is not correct. Such a limitation is not taught in Kaneshige and has no bearing on the claim limitation. In Kaneshige there is no obstruction between the walls 13 and the substrate 12, therefore, Kaneshige (figs. 12&13) disclose walls 13 formed directly on the substrate 12.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the

Art Unit: 3663

teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, there is some teaching, suggestion, and motivation in Chung et al (5827997) to modify the Kaneshige invention. That is Kaneshige et al (fig. 12) disclose a substrate 12, but they did not particularly mention that the substrate is composed of a polymer with embedded metal particles, although in column, lines 1-6, they suggested applying any suitable electromagnetic shielding material to the inner side of the cover. Chung et al (col. 5, lines 64+) teaches of a cheaper electromagnetic shielding material composed of a polymer (matrix) with embedded metal particles. Therefore, it would have been obvious to one of ordinary skill (who is interested in saving cost) in the art of microwave screening, at the time the invention was made, to make the substrate of the Kaneshige et al device to comprise a polymer with embedded metal particles because it is **cheaper** as taught by Chung et al, col. 2, line 24.

The examiner had issued an objection to the applicants' specification, page 1, requesting that page 1 be written in proper idiomatic English. Particularly, there is a missing statement after "Germany" line 5. The objection still stands since the applicants have not amended or corrected the error of page 1. The applicant has amended page 2 of the application instead of page 1.

For the above reasons, it is believed that the rejections should be sustained.

Art Unit: 3663

Respectfully submitted,

Thomas Black  
SPE, Art Unit 3663
